

PARTNER ROLE

A Partner helps the organisation understand how work is really experienced... and where to focus next.

You're here to create clarity across the organisation so teams can focus on what matters most.

What does a partner do?

- **Set the foundations** - Put the right structure in place so people can get started with clarity.
- **See what's happening** - Notice patterns across teams to understand where things are working or feeling heavy.
- **Guide where to focus** - Gently steer attention towards what will make the biggest difference right now.

WHY THIS ROLE MATTERS

Without a Partner, effort grows but alignment doesn't. With one, patterns emerge and teams move forward together, driving meaningful performance.

WHAT IT LOOKS LIKE IN PRACTICE

- Setting up initial teams and assigning Champions
- Running the Organisation Diagnostic as a baseline
- Reviewing Snapshot to spot patterns across teams
- Checking in with Champions to guide focus
