

Hi Humaniser!™

PARTNER GUIDE

Helping your organisation stay clear, aligned, and focused where it matters most.

Simple actions. Real impact.

Your role as a Partner

You help your organisation understand how work is really experienced... and where to focus next.

You're not here to run teams.
And you're not here to manage the platform.

You sit across the organisation, connecting what's happening in different teams
and helping turn those signals into clarity and direction.

In practice, this comes down to three things:

**Set the
Foundations**

**See What's
Happening**

**Guide Where
to Focus**

Set the Foundations

You're creating the structure that allows the organisation to get started with clarity.

- Create teams and assign Champions to guide them
- Invite users and connect them to the right team
- Set your organisation plan based on size and needs

You can manage this anytime in
Organisation Settings (top right corner)

Teams thrive when kept between 8–12 people.
You can add up to 20 members per team for meaningful connection.

This is not about creating a perfect team structure, it's about creating a space where people can actually connect and contribute

See what's happening

You use the **Partner Hub** to turn team activity into a clearer picture of what needs attention.

Across the organisation

At a glance, you can understand what's happening across all teams.

- Which Pressure Points are showing up most
- What teams are working on collectively
- Where engagement is building... or dropping
- Which practices are being used the most.

This helps you quickly see patterns,
not just isolated activity.

Within each team

You can go deeper into any team to understand their reality.

- Their latest poll results and what the team is prioritising
- Their current cycle, focus, and time remaining
- Their level of engagement so far
- Their reflections, in their own words

This helps you understand the
team's current focus, progress and
level of engagement.

Guide where to focus

You help the organisation focus by using data, signals, and real team experience.

Use your Organisation Diagnostic

Head to the **Partner Hub** to run your Organisation Diagnostic and establish a clear baseline. This gives you a structured view of how work is experienced across the organisation.

Run it once to understand where things stand today, then repeat it every 4–6 months to see what's improving, what's not, and where attention is needed.

Over time, this becomes your reference point for tracking progress and grounding decisions.

Support focus across teams

Use the Diagnostic results alongside the **Partner Hub** insights to support your Champions and guide the organisation with clarity.

Look across teams to spot recurring challenges, compare where focus is being placed, and notice where support or alignment might be needed.

Be part of the journey

This works best when you're actively involved, not just observing from a distance.

Stay connected to what teams are working on, support your Champions through simple check-ins, and take part in your own **Personal Pathway** and micro-actions.

Your involvement sets the tone and reinforces that this is part of how work happens here.

Use the support around you

You don't need to figure this out on your own. Everything you need sits in your **Champion Toolkit**, ready when you need it.

Need a quick nudge in the moment?

Use **HH! Moments** to support conversations, bring focus, or shift direction. They're simple, practical, and easy to introduce across teams.

Want to explore a challenge more deeply?

Go to **Leading Under Pressure**, where you'll find guidance tailored to the challenges you're seeing across teams.

If things are not going as expected...

Head to **When Things Get Tricky...** for support navigating real situations that come up across teams and organisations.

Want to connect what's happening across teams?

Use **Cross-Team Workshops** to bring teams together, share insights, and align around common challenges.

Stay close to your Champions. Use the insights available to support them and keep momentum moving.

Top 5 FAQs:

A few things that often come up when getting started.

-  **How much time does this take?**
There's no fixed time. A short weekly check and a deeper monthly look is usually enough.
-  **Where should I start?**
Set up your teams in Organisation Settings, then run the Diagnostic from the Partner Hub.
-  **What if Champions don't engage?**
Start with a simple conversation. Share what you're seeing and support them to take the next step.
-  **Should I step in if a team is struggling?**
Not directly. Support the Champion, share insights, and help them decide how to move forward.
-  **Do I need to use everything in the Partner Toolkit?**
No. Start with what helps most, and use other tools as needed.

Small actions.
Clear focus.
Real conversations.
